TRAIL NAME	MILEAGE	BLAZE COLOR	APPROVED USAGE	RATING	TRAIL EXPERIENCE*
Hickory Ridge Trail	4.00	Green		Moderate	2, 3, 7
Lakeview Trail	1.10	Orange		Easy	2, 3, 7, 9
Monsanto Lake Water Trail	1.25	Red		Easy	20, 21, 22
ORV Riding Area**	54.00	Brown		N/A	2, 3, 4, 5, 7, 8, 10, 11
Paved Bicycle Trail	11.00	Yellow		Easy	1, 7, 8, 9, 12
Galena Trail	7.80	Blue		Rugged	2, 3, 4, 5, 7, 8, 10, 11
Pine Ridge Trail	12.60	Red		Moderate	2, 3, 7, 10, 12
Connector Trail ( )		White			

Connector trails are available on some trails, are numbered and will modify your hike. See map for more information.

*** YOU MAY EXPERIENCE:** ❶ Slippery conditions and/or downed vegetation ❷ Natural surface: dirt, mud, gravel, loose rocks, slippery surface, etc. ❸ Rocks, roots and/or downed vegetation on trail ❹ Low-hanging vegetation ❺ Physically challenging obstacles ❻ Wood or stone steps ❼ Steep grades and inclines over 10% ❽ Bluffs or drop-offs next to trail ❾ Bridges and/or structural crossings ❿ Water/stream crossings without bridges ⓫ Occasional water over trail ⓬ Road/highway crossing ⓭ Emergency response signs ⓮ Narrow passages ⓯ Raised or protruding obstacles ⓰ Electric fence crossings ⓱ Bison ⓲ Rapidly changing weather conditions ⓳ Motorized boat traffic ⓴ Unexpected waves ㉑ Changing water levels ㉒ Surface or submerged objects

**Motorcycles, ATVs, UTVs, dune buggies and 4x4 Vehicles

HICKORY RIDGE TRAIL

4-mile loop TRAIL RATING: Moderate
ESTIMATED HIKING TIME: 3 hours

Hickory Ridge Trail takes users through sections of typical hardwood woodlands including hickory trees and sections of shortleaf pine, Missouri's only native pine. The terrain is varied with natural surface, rocky portions, level areas and steep inclines, which makes the trail popular with mountain bikers. White Connector 1 allows users to shorten the route. Campers in Campground 2 have access to this trail from the basic loop and the electric loop. The trail shares a trailhead and a section with Pine Ridge Trail. It is a multiuse trail and hikers and bicyclists are asked to yield to the horses.

LAKEVIEW TRAIL

1.1-mile loop TRAIL RATING: Easy
ESTIMATED HIKING TIME: 35 minutes

The majority of Lakeview Trail is natural surface (dirt and rock), but a two-tenth mile section along Monsanto Lake is paved and accessible. Portions of the trail along the lake follow the contours with a few rolling hills. Other portions of the trail are somewhat steep with loose gravel. The trail is suitable for mountain biking, hiking and running. Lakeview Trail intersects with the Paved Bicycle Trail.

MONSANTO LAKE WATER TRAIL

1.25-mile loop TRAIL RATING: Easy

Boaters on Monsanto Lake Water Trail can see a different side of St. Joe State Park by experiencing it from a canoe or kayak. At various stops around the lake, boaters can see and learn about the park's different cultural and natural aspects, including a dolomite glade, native grasses, shortleaf pines and the Old Lead Belt. An interpretive brochure, available near the lake's boat ramp, explains these features and how they relate to the park. The trail route is signed in a clockwise direction.

Note: Personal flotation device usage is required.

MISSOURI DEPARTMENT OF NATURAL RESOURCES

OFF-ROAD VEHICLE (ORV) RIDING AREA

54-mile system

The Off-Road Vehicle (ORV) Riding Area consists of 54 miles of trail, some of which are a surface of tailings (crushed limestone rock, a sandlike substance referred to as the "sand-flats"). The remaining area is wooded hillsides. Motorcycles, ATVs, side-by-side vehicles (also known as Utility Task Vehicles – UTVs), dune buggies, four-wheel drive vehicles and snowmobiles are permitted to use the area. Permits can be purchased online, at the park office, and at the check station (located in the staging area north of Pim Lake). Specific safety gear is required. Please review the complete list of rules and regulations available on the web at mostateparks.com or obtain a copy from the park office.

Only motorcycles, ATVs and UTVs are permitted to use the trails in the woods. The other larger vehicles, due to their size, are restricted to the sandflats, which have a vegetated desertlike appearance. Trails are identified with a three digit numbering system. The "100" trail, which circumvents the entire riding area, is identified with brown blazes. The wooded trails vary in difficulty from relatively flat earthen-type surfaces to very steep, rocky, eroded slopes.

When accessing St. Joe State Park through the Donnelly-LaMear trailhead, an ORV permit must be purchased in advance at mostateparks.com or the park office, located at the main entrance of the ORV riding area.

PAVED BICYCLE TRAIL

11-mile loop TRAIL RATING: Easy
ESTIMATED HIKING TIME: 5 hours, 30 minutes

Paved Bicycle Trail is open for hiking and biking and a 3.75-mile section is wheelchair accessible. Users of the trail will experience a wide variety of plant and animal life as well as catching glimpses of the park's off-road vehicle riding area. Certain sections of the trail have inclines greater than 10% while other sections have drop-offs close to the edge.

The first two trailheads are located along the main 11-mile loop and are called the Blankshire and Harris Branch trailheads. Both of these trailheads offer access to the section of the trail that is accessible to wheelchairs. A third trailhead is located just north of the park office at the Pim Day-Use Area. If starting at and returning to this trailhead, users can expect a total trip of 12.5 miles. If users start at the trailhead at Missouri Mines State Historic Site, the round trip will be 12.25 miles. The Farmington trailhead in the southeast part of the park offers a round trip of 14.5 miles.

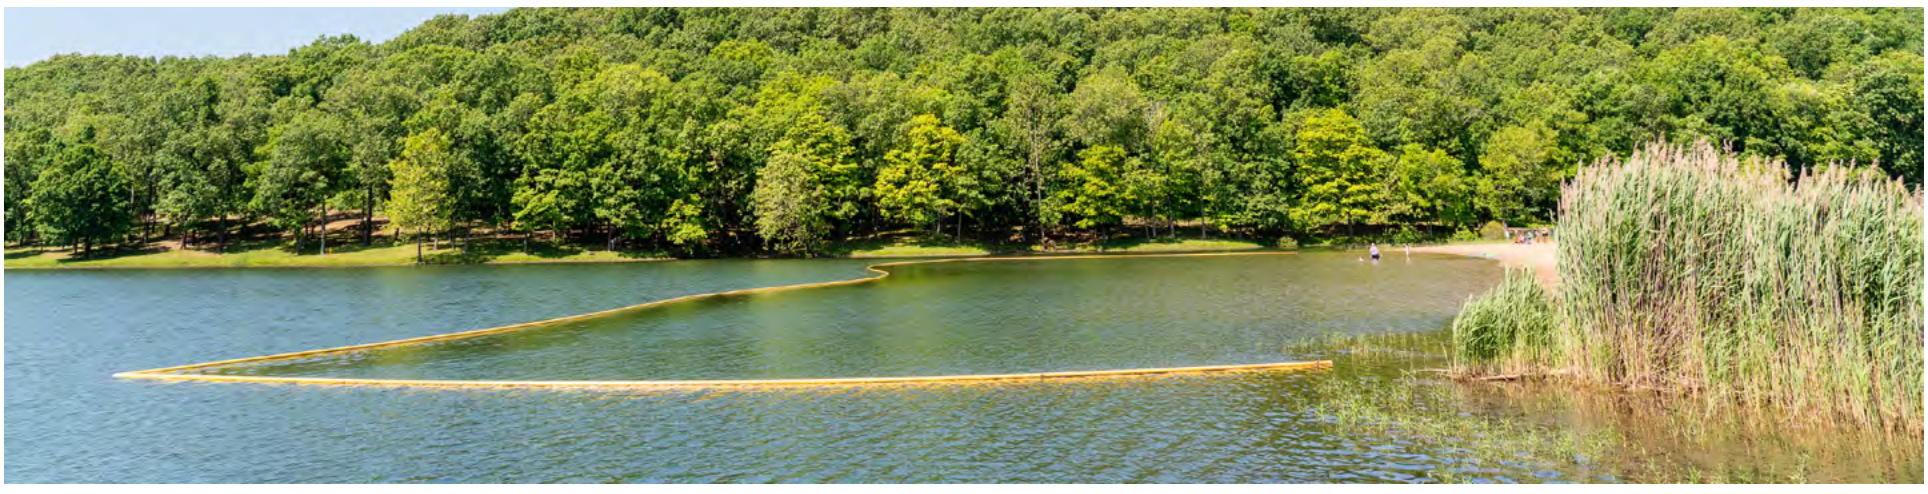
GALENA TRAIL

7.8-mile loop TRAIL RATING: Rugged
ESTIMATED HIKING TIME: 7 hours, 45 minutes

The Galena Trail is natural surface of dirt and rock, and passes through a beautiful hardwood and pine forest of Missouri. Users of the trail will experience a mix of moderately steep uphill and downhill sections as well as easy level riding flows. It includes a section through a culvert under the Paved Bicycle Trail (with an alternate path around) and parallels parts of the Paved Bicycle Path. The trail is suitable for hiking, running and mountain biking.

PINE RIDGE TRAIL

12.6-mile loop TRAIL RATING: Moderate
ESTIMATED HIKING TIME: 9 hours, 45 minutes

Pine Ridge Trail offers a wide variety of terrain. Part of the trail has a natural surface of dirt or gravel-sized rock while other parts are extremely rocky ranging from almost like a creek bed to areas where rock outcroppings make it difficult to maneuver. Portions are relatively steep while other sections are rather level. Some sections will take users through a typical hardwood woodland while other sections travel through pine trees. The trail crosses a stream in a few places, but during very dry weather, the stream may not have water in it.


Campers in Campground 2 have trail access from the basic loop and the electric loop. This trail shares a trailhead and a section with Hickory Ridge Trail. White Connectors 1 and 2 provide access to portions of Hickory Ridge Trail. White Connector 3 can be used to shorten the hike or ride. The trail is popular with hikers, equestrian users and mountain bikers. Hikers and bicyclists should yield to equestrian users.
