Welcome to

**Pine Tree Creek
Nature Trail**

Big Pine Tree Creek Nature Trail

Minutes from **Camden, South Carolina**, lies a hidden forest treasure: **Big Pine Tree Creek Nature Trail**. This trail is located at N.R. Goodale State Park, which also offers a 140 acre lake with rental boats including kayaks, canoes, and fishing boats for those who would like to enjoy a three mile canoe trail. The park also includes picnic areas and a rental Community Building.

The Big Pine Tree Creek Nature Trail is 1.7 miles round trip, and makes a loop through a pine forest which borders the park lake. Markers identify common trees native to South Carolina. When crossing the small bridge, notice the cool, clear spring, and the large old trees, offering visitors a soothing environment for relaxation and reflection.

Learning opportunities abound in this outdoor classroom where conservation education, history, resource management, and wildlife studies can enhance classroom instruction. Local and migrating wildlife frequent the trail and pine woods; listen for woodpeckers, hawks, frogs and insects and observe reptiles, amphibians, birds and mammals.

Take along this **Tree Identification Guide** to learn more about the trees along the trail. The guide is numbered to identify the matching trees.
